UX Immersion | Task 1.10

Jay Lawlor

The Functional Requirements of the Ahoy! App:

- Splash Screen
- Account Creation / Login (including social login option)
- Navigation Menu
- Onboarding Sequence
- Home Screen
- Weather Dashboard with Real-Time Wind, Weather, and Algae Reports
- Search Weather Reports and Forecasts by Location
- Weather Reports and Forecasts Search Results
- Set Weather Conditions Preferences
- Weather Conditions Rating (based on set preferences)
- Recommendations to help users stay safe
- Profile with account information, saved locations, and saved weather conditions preferences

User Stories

As a user with many apps on my phone, I want to see a **Splash** screen, so that I know I am using the desired app.

As a new Ahoy! user, I want to **Create an Account** with either my email or social accounts, so that I can customize my experience.

As an existing Ahoy! user, I want to **Login** to my account with either email or social accounts, so that I can access my customized features.

As a user of Ahoy!, I want to use a **Menu**, so that I can easily navigate around the app.

As a new user to the Ahoy! app, I want to go through an **Onboarding Sequence**, so that I can get an overview of all the features and how to navigate the app.

As a user of Ahoy!, I want to access a **Home** page, so that I can easily find all the features of the app from one place.

As a recreational boater, I want to view a **Weather Dashboard**, so that I can get real-time wind conditions, weather conditions, and algae reports when I am boating.

User Stories

As a boater who likes to travel along the coast, I want to **Enter Locations**, so that I can search the weather in different locations along the coast.

As a boater who searches locations for marine weather, I want to access **Weather Report and Forecast Search Results**, so that I can discover marine weather conditions for where I'd like to go boating.

As a recreational boater who has specific weather conditions I like to boat in, I want to **Set Weather Conditions Preferences**, so that I can find my ideal boating days.

As a boater who uses the Ahoy! app to set weather preferences, I want to get a **Weather Conditions Rating**, so that I can quickly know if it is a good day for me to go boating.

As a safety-conscious boater, I want to get **Recommendations** on boating and weather safety, so that I can stay safe on the water.

As a user of the Ahoy! app, I want to access my **Profile**, so that I can review my account information, saved locations, and weather conditions preferences.
